

IHS TECHNOLOGY INTELLIGENCE SERVICE

Wearable Technology

FEATURED COVERAGE

- Consumer Sentiment
- Mobile Apps for Wearables
- Operating Systems and Platforms
- Smart Watches and Glasses
- Sports & Fitness
- High Growth Industry Sectors
- Insight on the wearables' ecosystem
- Virtual Entertainment
- Smart Clothing
- Medical Wearables

Leverages IHS research across numerous fields to provide a comprehensive look at the apps, industries, and technologies driving growth in the global Wearables market

Real time access to a continuous flow of research across geographies, topics and application areas:

Market Insights

Frequent analyst commentary on product launches, market news and analysis.

Quarterly Market Database

Historic and forecasted, delivered in Excel and in IHS TRAX®, an online analysis tool.

Reports

Periodic topical reports addressing key focus areas, detailing segmented analysis.

Analyst Access

For prompt responses to urgent and unique questions.

The Wearable Technology Intelligence Service provides

Market Briefs – A minimum of 3 will be issued throughout the year. Topics for 2016 will include: Smartwatches, Wearables in Healthcare, and Diabetes Management. The 2015 briefs (also included) covered topics such as Smartwatches, Smartphone OEM developments and more.

Wearable Technology Database - contains ongoing data, analysis and deep dive reports on the market with insights from analysts throughout IHS Technology. 24 product types, 5 industry applications and 160 companies.

Topical Reports – 3 or more per year, these deliverables provide visuals and commentary focused on wearable technology subjects. In 2016 reports will include: Diabetes Management, Wearable Apps and Hearing Health. The 2015 reports (also included) cover: Virtual Reality in Entertainment, Displays in Wearables and Smart Clothing
