

TV Media

The only truly comprehensive source of television market intelligence available, anywhere

Today's television is more than just an end-market: it is a dynamic, global industry that touches billions of lives and, in the process, generates many billions in revenue. If tracking the players and trends in this arena is key to your business performance, it is important that you have a source of information and insights that is easily accessible, up-to-date and, most importantly, highly accurate.

The TV Media Intelligence Service provides:

- On-line access to constantly updated and detailed company and market level data analysis on the pay and free television industry across 70+ countries worldwide.
- Data compiled and presented company-by-company, platform-by-platform, providing detailed information on both operators and markets.
- Market-level data is underpinned by company-level data, individual company-level forecasts and accompanied by expert analysis.
- All data is supplemented by direct access to expert analysis who will provide you with detailed answers to specific questions
