

TECHNOLOGY INTELLIGENCE SERVICE

IoT Cybersecurity

Complete coverage of the hardware, software, and supporting services that help protect IoT devices and their data

Real-time access to a continuous flow of research across geographies, topics, and application areas:

FEATURED TOPICS

- IoT security market overview
- Security technology and services
- Threat detection and mitigation
- Orchestration and automation
- Management and analysis

Analyst insights

Frequent analyst commentary and analysis on product launches and market news

Market tracker

Historic and forecasted market data, delivered in Excel and accompanied by written analysis

Analytical database tool

Tailored views of application market data

Reports

Annual topical reports addressing key focus areas with in-depth analysis on market and technology trends

Vertical market briefs

Studies addressing key vertical markets, delivered throughout the year

Analyst access

For prompt response to urgent and unique questions

Clients of this Intelligence Service will receive:

IoT Cybersecurity Market Tracker – Coverage of the wide range of products and services that are used to bring security solutions like threat detection and mitigation to the IoT realm

Product Guide and Market Trends Report – In-depth examination of market trends, segmented by technology and IoT vertical, including high-level vendor analysis

Customer Survey – North America – A survey of small, medium, and large businesses, focusing on their plans for securing IoT devices within their networks

Vertical case studies and market briefs – Concise case studies and market briefs on the implementation of specific solutions designed to meet the unique requirements of the IoT cybersecurity market

Continuous and timely insights from industry experts – Reportage on market news, trends, and activities as they happen, including access to analysts for urgent questions

Research coverage

Security hardware and software	Security methodologies	Measures
Cloud data security DDoS protection services Device gateway appliances Embedded technologies Network security solutions Threat intelligence support Virtual appliance protection	Access control Analysis and management Authentication Encryption Orchestration and automation Penetration testing Threat detection and mitigation Vulnerability assessment	Revenues

Vertical markets

Automotive / transportation	Consumer	Commercial and industrial electronics
Aerospace and military Automotive – ADAS and others Automotive – other Infotainment	Home appliances Home automation Consumer electronics PC peripherals Portable CE Sports and fitness Other consumer	Commercial electronics Industrial automation Fixed assets Mobile assets Lighting Power and energy Security and building automation Other
Communications Backbone Consumer CPE Enterprise CPE Licensed mobile radio infrastructure Mobile handset infrastructure	Computers (enterprise) Desktop PCs Portable PCs Servers	Medical Consumer medical Clinical devices

Regions	Sample companies
Worldwide	A10 Citrix
North America (US and Canada)	Amazon F5 Networks
Europe, the Middle East, Africa	Bitdefender Juniper
Caribbean and Latin America (including Mexico)	CenturyLink McAfee
	CheckPoint Symantec
	Cisco
